Do you maintain a separate Git repo for the debian packaging? The only way I found to build a custom Debian package is to get /debian from here [1] and merge with a git pull of the latest release. Wouldn't merging the packaging scripts in the main source tree be easier to maintain and easier for other to contribute?

Hi Simon,

Thanks for the patch :)... We are in the process of integrating the source code of the apps within the OpenNebula source tree. This should probably happen before 4.0 or right after that.

Thanks again for your contributions to OpenNebula

Ruben

##### #4 - 04/17/2013 10:53 AM - Jaime Melis

- Status changed from Assigned to Closed
- Resolution set to fixed
