

OpenNebula - Bug #1807

Prevent relevant ERROR_MESSAGES to be deleted

03/12/2013 11:13 AM - Ruben S. Montero

Status: Closed	Start date: 03/12/2013
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	Pull request:
Resolution: fixed	
Affected Versions: OpenNebula 4.0	

Description

The hosts only have one type of template error message, monitorization, but the VMs can have different messages: attach failed, monitorization failed, etc.

As the code is now, if the VM has an operation message (e.g. could not attach disk), a successful monitorization will clear that message.

Maybe we could define two types of errors: the ones that inform of a failed operation, and the ones that can be resolved on their own and can be cleared (monitoring).

The failed operations could be stored in a vector attribute:

```
ERROR_MESSAGES = [ ERROR = "attach failed because...", ERROR = "shutdown failed because..." ]
```

Associated revisions

Revision 9af900cd - 03/15/2013 04:37 PM - Ruben S. Montero

bug #1807: Adds a new ERROR_MONITOR message. Fix monitor timers when monitor fails.

History

#1 - 03/15/2013 04:34 PM - Ruben S. Montero

- Status changed from New to Closed
- Resolution set to fixed

There are now two separated error messages ERROR and ERROR_MONITOR to keep both.
