

OpenNebula - Bug #1862

VM Template Network Model field is ignored

04/03/2013 04:19 PM - Matthew Richardson

Status:	Closed	Start date:	04/03/2013
Priority:	Normal	Due date:	
Assignee:	Daniel Molina	% Done:	100%
Category:	Sunstone	Estimated time:	0.00 hour
Target version:	Release 4.0	Pull request:	
Resolution:	fixed		
Affected Versions:	OpenNebula 4.0		

Description

I've tried setting the MODEL field in the Networking section of a vm template to virtio, but this doesn't seem to pass to the guest, which uses an rtl8139 device by default.

Adding the config via 'onemplate update 1' on the cmd-line is successful though - adding: NIC=[MODEL="virtio"]

This then shows up in the template view in the GUI, but the MODEL: field remains empty when you choose to update the template there, and is then removed from the template if you click 'update'.

bug #1862: Fix model field in vm template creation form

History

#1 - 04/04/2013 10:01 AM - Daniel Molina

- Status changed from New to Closed
- Assignee set to Daniel Molina
- Target version set to Release 4.0
- % Done changed from 0 to 100
- Resolution set to fixed

It should be fixed now in the one-4.0 branch. Thank you
