**Description**

In oneuser_helper.rb on line 151, the second parameter to login method is `Time.now+options[:time]`.

The login method of both `OpenNebula::X509Auth` and `OpenNebula::SshAuth` something like `expires = Time.now.to_i + expire.to_i`.

Thus, `Time.now` is added twice and the login virtually never expires.

The attached patch fixes this.
