Target version:	Release 2.0	Pull request:	
Resolution:			
Description			
<p>Because the target attribute for VM disks using images is generated automatically, some additional checks should be done to consider a VM template valid.</p> <p>In particular, two DISKS using an OS type image each one will be automatically assigned to "sda". The same happens for CDROM images.</p> <p>There should be a restriction on the maximum number of disks using these image types.</p>			

Associated revisions

Revision 5997d7ff - 07/20/2010 06:09 PM - Carlos Martín

feature #281: VM can only use now one OS image and one CDROM image.

Revision cde239b9 - 07/20/2010 06:10 PM - Carlos Martín
