

OpenNebula - Bug #365

oneimage help shows wrong information about filter_flag values

10/07/2010 03:08 PM - Daniel Molina

Status:	Closed	Start date:	10/07/2010
Priority:	Normal	Due date:	
Assignee:	Javi Fontan	% Done:	100%
Category:	CLI	Estimated time:	0.00 hour
Target version:	Release 2.0	Pull request:	
Resolution:	invalid		
Affected Versions:			

Description

The current help information for oneimage shows:

```
* list (Shows Images in the pool)
oneimage list <filter_flag>
```

where filter_flag can be

- a, all --> all the known Images (admin users)
- m, mine --> the Images belonging to the user in ONE_AUTH
and all the Public Images
- uid --> Images of the user identified by this uid (admin users)
- user --> Images of the user identified by the username (admin users)

and it should be

```
* list (Shows Images in the pool)
oneimage list <filter_flag>
```

where filter_flag can be

- a, all --> all the known Images
- m, mine --> the Images belonging to the user in ONE_AUTH
- uid --> Images of the user identified by this uid
- user --> Images of the user identified by the username
