

## OpenNebula - Bug #3743

### ipset has wrong path in sudoers under Debian 7

04/08/2015 07:24 PM - Johannes Brummer

<b>Status:</b>	Closed	<b>Start date:</b>	04/08/2015
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Javi Fontan	<b>% Done:</b>	0%
<b>Category:</b>	Packaging	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Release 4.14	<b>Pull request:</b>	
<b>Resolution:</b>	fixed		
<b>Affected Versions:</b>	OpenNebula 4.12		
<b>Description</b>			
<p>Continued from #3665</p> <p>Under Debian 7, ipset is found at /usr/sbin/ipset</p> <p>Under Debian 8, ipset is found at /sbin/ipset</p> <p>Easy fix would be:</p> <pre>-Cmnd_Alias ONE_NET = /sbin/brctl, /sbin/eatables, /sbin/iptables, /sbin/ip, /sbin/ipset +Cmnd_Alias ONE_NET = /sbin/brctl, /sbin/eatables, /sbin/iptables, /sbin/ip, /sbin/ipset, /usr/sbin/ipset</pre> <p>More complicated fix would be to add some postinst/configure -script which checks for Debian version and drops the correct line in place. Or something like that.</p> <p>Or this could just be filed under Known Issues (so it can be easily found) and set goal to update Platform Notes/Certified Platform Component to Debian 8 (should be released 25.4.2015).</p>

- Assignee changed from Jaime Melis to Javi Fontan

**#4 - 05/28/2015 02:16 PM - Javi Fontan**

Now there are two directories, one for debian 7 and other for 8. The change is applied to debian 7 file. Now the package creation must be changed to get the files from that directory.

Thanks!

**#5 - 05/28/2015 03:50 PM - Javi Fontan**

- *Status changed from New to Closed*

- *Resolution set to fixed*
