<b>Target version:</b>	
<b>Description</b>	
<p>At the moment, the checks performed by get_xmlrpc_config at configuration time, to detect xmlrpc-c C++ build options, will only report whether builds are succesfull or not, and so which recipe worked.</p> <p>This isn't easy to debug, in case of failures, when building happens inside a chrooted environment or similar (typically with pbuilder/cowbuilder for Debian packages generation).</p> <p>I think it could be interesting to display the logs instead of silently discarding them.</p> <p>See the proposed patch in debian/patches/verbosesconsrecipe.diff committed in <a href="http://anonscm.debian.org/cgiit/pkg-opennebula/opennebula.git/diff/debian/patches/verbosesconsrecipe.diff?id=8f7a457c6116621be5f11d0f66c454212400bd3">http://anonscm.debian.org/cgiit/pkg-opennebula/opennebula.git/diff/debian/patches/verbosesconsrecipe.diff?id=8f7a457c6116621be5f11d0f66c454212400bd3</a></p> <p>Thanks in advance.</p> <p>Best regards,</p>
