Description

Hi,

I'm not totally sure if this belongs here or should be marked as a bug for the appmarket. Please let me know if I need to post it @ <https://github.com/OpenNebula/addon-appmarket>

When you import an appliance from the Appmarket a template and image get created. With the following json strings in the template some of the features (ACPI and LOCALTIME) are missing/not present.

I have tried the following two json versions in the appliance template:

Not working 1:

```
{
  "CONTEXT": {
    "NETWORK": "YES",
    "SSH_PUBLIC_KEY": "$USER[SSH_PUBLIC_KEY]"
  },
  "CPU": "1",
  "VCPU": "1",
  "GRAPHICS": {
    "LISTEN": "0.0.0.0",
    "TYPE": "vnc"
  },
  "MEMORY": "1024",
  "OS": {
    "ARCH": "x86_64",
    "ACPI": "YES",
    "LOCALTIME": "NO"
  },
  "LOGO": "images/logos/ubuntu.png"
}
```

Not working 2:

```
{
  "CONTEXT": {
    "NETWORK": "YES",
    "SSH_PUBLIC_KEY": "$USER[SSH_PUBLIC_KEY]"
  }
```

```
},
"CPU": "1",
"VCPU": "1",
"GRAPHICS": {
  "LISTEN": "0.0.0.0",
  "TYPE": "vnc"
},
"FEATURES": {
  "ACPI": "YES",
  "LOCALTIME": "NO"
},
"MEMORY": "1024",
"OS": {
  "ARCH": "x86_64"
},
"LOGO": "images/logos/ubuntu.png"
}
```

The attached screenshot shows that both ACPI and LOCALTIME are not set from the json settings as provided in the examples above.

BTW it seems to be a Sunstone only bug, onetemplate show <template_id> shows the correct output with the second JSON example.

#2 - 09/09/2015 09:49 AM - Carlos Martín

- Subject changed from Appmarket json features not exposed in template view to Updates for select fields are case sensitive
- Category set to Sunstone
- Status changed from Pending to New
- Assignee set to Carlos Martín
- Target version set to Release 4.14
- Affected Versions Development added

Hi,

I've done a quick test and the problem is that the values are case sensitive, sunstone only works with "yes" in lowercase.
This will be fixed in 4.14.

Regards
