<b>Target version:</b>			
<b>Description</b>			
Add option to Reschedule (live) that migrates the running VMs with migrate(live)			
I think that this way it will be faster and with less downtime.			
Kind Regards Anton Todorov

Hi,

This is actually supported, it can be enabled in sched.conf:

<http://docs.opennebula.org/4.14/administration/references/schg.html#configuration>

Ok,

But what do you think to have both options available? Same as current migrate and migrate(live)?

So we can have two clusters and one admin to use reschedule on its cluster, but the admin on the other cluster to use reschedule(live) simultaneously...

Cheers,
