

OpenNebula - Bug #4335

vCenter password cannot be longer than 22 characters

02/16/2016 09:10 AM - Louis Moebius

Status:	Pending	Start date:	02/16/2016
Priority:	Normal	Due date:

Target version:		Pull request:	
Resolution:			
Affected Versions:	OpenNebula 4.14		

Description

When I try to connect a vCenter host using a password longer than 22 characters I get:

Error monitoring Host Shelter (1): Error executing vcenter.rb

It looks like this is related to Bug #3766: "vCenter password gets double encrypted on host template update" and this revision: 101d015a

The problem is that the vCenter driver (vcenter_driver.rb:94) doesn't check if the password is longer than 22 characters (thus plaintext) producing the error above.
