Category:		Estimated time:	0.00 hour
Target version:		Pull request:	
Resolution:	duplicate		
Affected Versions:	OpenNebula 5.0		

Description

I have a VM running under FreeBSD.
I shutdown the VM to remove a disk (CD ISO).
I detach the image disk.
I click on "Play", to run again the vm.
I click on "Refresh" and the window display:
- The good idea of the VM, but the name of a test vm deleted since many weeks.
- The disk list is not correct and seems to display disk with low id (first imported in opennebula).

History

#1 - 08/20/2016 12:51 PM - Yannick MOLINET

Click refresh a second time, display the correct information ...

#2 - 08/22/2016 08:17 AM - Carlos Martin

- Status changed from Pending to Closed
- Resolution set to duplicate

Thanks for reporting this.

It is a duplicate of #4711, will be fixed in the next release.
