

<https://downloads.opennebula.org/repo/Debian/repo.key>).

Also the downloads server can now be accessed using https (Let's Encrypt certificates).

I'll leave this ticket open to update the documentation and testing environment. Here is the repo conf to use as base for documentation:

```
[opennebula]
name=opennebula
baseurl=https://downloads.opennebula.org/repo/...
enabled=1
gpgcheck=1
repo_gpgcheck=1
gpgkey=https://downloads.opennebula.org/repo/Debian/repo.key
```

Is repo_gpgkey really needed?

#5 - 01/17/2017 10:53 AM - Javi Fontan

- Assignee changed from Javi Fontan to Vlastimil Holer

#6 - 02/09/2017 03:24 PM - Vlastimil Holer

- Pull request set to <https://github.com/OpenNebula/docs/pull/87/commits/5a2097c8f45d9144bae5b820c3d18b9fc1154efa>

I have prepared the change of the documentation so that

- https is used for (apt/yum) repositories and
- gpgcheck=1 is enabled (leaving repo_gpgcheck commented) for yum.
