#### Description

Hello,

I need to manually install the package **ruby-treetop** to make the OneFlow service running:

```
journalctl -u opennebula-flow.service

```

It should be added to the package **Depends:**.

Thanks.

#### History

##### #1 - 08/24/2017 01:02 PM - Javi Fontan

- Status changed from Pending to Closed

- Resolution set to worksforme

The gem `treetop` is installed by script `install\_gems`. It installs the version we test in our infrastructure that is not always the packaged version in the distros.

##### #2 - 08/24/2017 02:12 PM - Javi Fontan

This is related to #5122. install\_gems script is not installed automatically by the opennebula-flow package.
