Revision e26e3abc - 06/16/2011 10:33 AM - Ruben S. Montero

feature #522: User can be authenticated using user/group info methods with uid/gid = -1

History

#1 - 04/08/2011 08:51 PM - Ruben S. Montero

- Category set to 11
- Assignee set to Daniel Molina
- Target version set to Release 3.0

#2 - 05/09/2011 02:56 PM - Vivien Bernet-Rollande

I think this is not actually a bug. You should specify "oneimage list all" to list all images for all users.

#3 - 07/12/2011 02:09 PM - Ruben S. Montero

- Status changed from New to Closed
- Resolution set to fixed

Yes, this seems to work in the last development version. In OpenNebula 3.0 'all' attribute is need for list to show all the resources (vms, templates,

networks...) as pointed out by Vivien.
