Pull request:			
Description			
<p>Maybe it's just me, but I find the expand button in the Sunstone web interface almost invisible. For example when I wanted to see which security groups are applied to a particular VM, I looked in the Network tab, but I couldn't find where is the list of Security Groups. I had to read the documentation to notice the expand button. I had a similar problem when working with disk snapshots.</p> <p>I don't have a suggestion how to make it more visible, maybe making it bigger and with a stand out color?</p>

Hi Strahinja,

Due to the general Sunstone style, we believe highlighting the expand button will break this. once noticed the first time, you'll know is there, but it won't stand in the way for future interactions with the interface.

Best regards.

Abel.
