

OpenNebula - Bug #611

VMware Disk driver shouldn't have a mandatory default value

05/04/2011 01:40 PM - Tino Vázquez

Status:	Closed	Start date:	05/04/2011
Priority:	Normal	Due date:	
Assignee:	Tino Vázquez	% Done:	100%
Category:	Core & System	Estimated time:	0.00 hour
Target version:	Release 3.0	Pull request:	
Resolution:	fixed		
Affected Versions:			

Description

It poses problems with VMware server, although it is fine with ESX.

From antoni artigues artigues@iac3.eu

```
-----  
/srv/cloud/one/bin/tty_expect -u oneadmin -p xxxxxxxx virsh -c  
gsx://oscardnode9/?no_verify=1 define /srv/cloud/one/var/73/deployment.0
```

```
error: Failed to define domain from /srv/cloud/one/var/73/deployment.0  
error: internal error Unknown driver name 'raw'
```

```
-----  
We see that in the deployment.0 file there is a driver called "raw", but  
we haven't defined this driver in the image description. Is it a bug  
from openNebula?
```
