

OpenNebula - Feature #619

Don't hardcode the path to ssh private key in oneauth

05/06/2011 09:32 PM - Lars Kellogg-Stedman

Status:	Closed	Start date:	05/06/2011

Target version:		Pull request:	
Resolution:	fixed		
Description			
<p>The 'oneauth' command currently hardcodes the location of the SSH private key file to \$HOME/.ssh/id_rsa. This may cause difficulties for people with multiple private keys. A better solution might be to keep that path as a reasonable default, but to allow the user to override the path with something like a ONE_SSH_KEY environment variable.</p>
