

OpenNebula - Bug #657

Sunstone does not honor the VM name (VM created with template)

Description

Hi,

I am using Opennebula "master" branch. I am highly interested in the template feature.

This works from the command line

```
onetemplate create -n "myvm" 6
```

A VM named "myvm" is indeed created. But when I try to do the same with Sunstone, for whatever I type in the "VM Name" field, I end up with a VM named "one-XX" where XX is an integer (VM ID).

Revision ea247285 - 05/23/2011 03:19 PM - Daniel Molina

bug #657: Change vm_name template to string instead of symbol

History

#1 - 05/23/2011 03:29 PM - Daniel Molina

- Category set to Sunstone
- Assignee set to Daniel Molina
- Target version set to Release 3.0
- % Done changed from 0 to 80

The attached patch should fix the problem.

Thanks for the feedback.
