

OpenNebula - Feature #664

Prefilter "arguments" for actions/commands

Description			
<p>Hi,</p> <p>If I want to (live-)migrate a VM in SunStone, I have to choose a target and I get a choice of all ONE hosts. It would be great if these were already filtered, so that disabled hosts are not shown. (Or would it make sense to migrate to a disabled host, because the request is queued until I enable that host ? Not sure here).</p> <p>Yours, Steffen</p>

Hi, some improvements have been made in that sense which are already in Master. Disabled hosts, or unpublished images, vnets which are not owned by the user do not show anymore on the drop down selects.

Therefore I will consider this as fixed and close the ticket. Still thank you very much for your suggestion!
