The problem is related to the Host Monitoring, if you diable it in acct.conf (set STEP to 0), it should work.

I cannot reproduce this error. Let's try to find out the problem, would yo mind to send us the following information?

- OpenNebula Version:
- OS distribution and version:
- Sequel and MySQL gem versions:
- Content of the HostPool when acct fails (onehost list -x)
- Output of the Host (onehost show 1 -x) that is causing the error, you can find its value in the error message:
Mysql::Error: Duplicate entry '1-0' for key 'PRIMARY' (Sequel::DatabaseError)
In this case the host ID is 1 "1-0"

Thanks

#6 - 11/23/2011 11:53 AM - Alain van Hoof

When starting oneacctd Error occurred again:

Mysql::Error: Duplicate entry '1-0' for key 'PRIMARY' (Sequel::DatabaseError)

ON3: version 3.0.0

OS: Centos 6.0 (incl. roling updates)

GEM: sequel (3.28.0), mysql (2.8.1)

onehost list -x output: See below

There is no host 1 so output of onehost show 1 -x is empty!

NOTE! The acct tables are in the MySQL database of the OpenNebula database.

#7 - 11/30/2011 05:07 PM - Daniel Molina

I cannot reproduce this error.

Are you still experiencing it?

Do you get the same error with an empty DB?, maybe the DB got corrupted

#8 - 12/07/2011 01:26 AM - kawo demo

i also have same problem and after create new database, the oneacctd daemon look fine but then automatically stop after 10minutes if using default configuration on acctd.conf.below all the details:

my error output

#9 - 12/07/2011 01:45 AM - kawe demo

This is the correction:

I also have same problem and after create new database, the oneacctd daemon look fine but then automatically stop after 10minutes if using default configuration on acctd.conf. Below all the details:

my system use:

Opennebula ver 3.0

OS ubuntu 10.04 LTS 64bit

sequel 3.29.0 , mysql 2.8.1

for your information my host01 computer now in error states not because of configuration but the computer is use by others person and not connected to front-end.oneacctd error occur before i lend my host01 computer to my friend.(not because host error) and before i create ec2 host and oneadmin host.

my error output

OK, I found out the problem. This patch should fix the problem.

http://dev.opennebula.org/projects/opennebula/repository/revisions/6176e07bac684135cbfe1cd46f9213cc8b41a371/diff/src/acct/watch_helper.rb

This patch is already included in 3.2-beta1 packages.

Hi,

Thank you for the path.

However we just installed and tested the patch and sadly it does not seem to solve the problem:

You have to use a new DB and apply the patch to fix the problem. BTW in your previous comments you were using MySQL backend in the last one the error shows an SQLite backend, maybe you are not using the right DB.

Hi,

Daniel Molina wrote:

Ok, I dropped and recreated the db.

And you were right about the sqlite, I started with the wrong config file.

That made it a bad test for this bug report, but it does indicate the at the sqlite db also has the problem.

However, as I said, acctd is now running with the patch, and a fresh mysql database.

Best regards,

Jhon

Are you still experiencing this error with OpenNebula 3.2.1?
